

1SB-404.2

AKA: *Shooting Star*

Pick-up Points:

Obverse markers (DMR1)

- TDO, belonging to 1971S SB DDO family 1 (b manifestation);
NOTE: 1971S DDO family 1 has multiple die representatives. One of the more notable is the WDDO-007 seen in 1SB-201 (FS-401 MMP1), and the WDDO-006, among others. The WDDO-007 and WDDO-006 are 1a manifestations, with distinct notching in the lower right foot of the R in LIBERTY. There are multiple dies in the 1b group, bearing the same doubling pattern as the 1a group, but the 1b manifestations are a) clearly TDO, b) a bit less spread, and c) have little or no apparent notching in the lower left part of the foot of the R in LIBERTY.

Reverse Markers

- characteristic "shooting star" (aka falling e) die gouges associated with star 6
- Moon line clash remnant contiguous with the top of the first "L" on DOLLAR, with die abrasion repair evidence now replacing the rest of the former full moon line clash
- DDR, belonging to 1971S SB DDO family 1 (c manifestation) - light spread
- die crack through N in UNITED
- parallel die scratches/gouges inside the O of ONE
- parallel die scratches/gouges coming off the right hand side of the base of the F in OF
- die scratch/gouge between the base of O and F in OF
