

# 2SB-402.2

AKA: *Trail Die*

## Pick-up Points:

### Obverse Markers

- Characteristic trail die effect best seen in “D” and” ST” in the motto, with small effect in the “U”
- multiple die cracks in the top of head
- Three small die gouges (dots) in the vicinity of the R in LIBERTY
- Small linear die gouge just below the loop in 9
- Two small die gouges (dots) below the “E” and east of the “T” in the motto

### Reverse Markers

**Note:** *due to die re-treatments, the reverse die can be identified in two distinct die stages, yielding 2SB-402.1 - earlier, and 2SB-402.2 - later*

- Up-line hub source DDR. Seen best in the earlier die state reverse, 2SB-402.1. Faint remains of the DDR can be observed in the later die stage, 2SB-402.2, however.

### 2SB-402.2 reverse markers

- No shadow associated with the earth (due to die re-treatments)
- No “extra lunar lines” (due to die re-treatments)
- Die Gouge (“Moon-snake”) to the right of the “R” in DOLLAR
- die gouges/scratches listed for the 2SB-401.1 are lost due to die re-treatments
