

# 2T2-101.1

AKA: *March Type 2*

## Pick-up Points:

### Obverse

- Obverse "N" die gouge "pimple" under IN of motto (common to all 2T2-101 Ikes)
- Dies scratches (all NW to SE in orientation): a neck scratch, the lower part of "E" in WE, between "G" and "O" of GOD, and between the "N" and "T" of IN and TRUST. The neck scratch is most robust to die state, while the lower E and G\O scratches are also fairly robust to die state, but not as much as the neck scratch. These scratches are solid markers for the 2T2-101 obverse (and not present on the 2T2-102 Ikes)
- Very small spread DDO (seen in 1, and the first T in TRUST, N, G, R in the motto)
- Obverse "baseball cap" die chip and reverse STATE die crack markers are NOT present
- EDS

### Reverse

- A very small spread DDR - seen in the AR, stars 13 and 12, and the "R" in AMERICA; easier to detect in early die state
- Type 2 earth
